SUPPLEMENTARY INFORMATION: This notice provides background on Agency actions regarding dichlorvos, lists the uses Amvac Chemical Corp. is proposing to delete and the uses it intends to support, and states the provisions for existing stocks.

I. Introduction

Dichlorvos is the commonly accepted name for 2,2-dichlorovinyl dimethyl phosphate, an organophosphate insecticide. Technical dichlorvos is produced by Amvac Chemical Corp. (Amvac) and is available as a 99.99% active ingredient technical product for formulating dichlorvos end-use products. Dichlorvos is a contact and stomach poison with fumigant action resulting in cholinesterase inhibition. Dichlorvos is used in the formulation of insecticide products for a wide range of uses in home and commercial establishments, as aerosols, liquid sprays, wettable powders, emulsifiable concentrates, soluble concentrates, pour-ons, granulars, and impregnated materials (resin strips and flea collars).

There are two ongoing activities which may affect the proposed use deletions specified in this notice: the dichlorvos Special Review and the pending revocation of the pesticide food additive regulation for packaged and bagged processed nonperishable food. Anyone interested in retaining these uses proposed for deletion in this notice should be aware that future action by EPA resulting from the Special Review or food additive regulation revocation may alter the status of one or more dichlorvos uses.

On February 24, 1988, EPA initiated a Special Review (previously referred to as an RPAR) for pesticide products containing dichlorvos. EPA determined that exposure to dichlorvos from the registered uses may pose an unreasonable carcinogenic risk and inadequate margins of exposure for

cholinesterase inhibition to exposed individuals. The risks of concern detailed in the 1988 notice were for the general population from consumption of foods containing residues of dichlorvos, for those involved in the application of dichlorvos, for workers reentering treated areas, for residents/occupants of treated areas, for people exposed to pets treated with dichlorvos, and for pets treated with dichlorvos. EPA expects to issue a proposed determination, as a result of the Special Review, in 1995.

In the **Federal Register** of October 3, 1991 (56 FR 50190), EPA proposed under section 409 of the Federal Food, Drug and Cosmetic Act (FFDCA) to revoke the food additive regulation for residues of the pesticide dichlorvos in or on packaged or bagged nonperishable processed food. The final rule revoking the food additive regulation was published on November 10, 1993, with an effective date of 120 days later. EPA later stayed the effective date indefinitely, pending Agency consideration of a petition from Amvac. This revocation remains stayed. If this action becomes effective it will mean the packaged and bagged processed nonperishable food treated with dichlorvos will likely be adulterated under FFDCA and the food may not be legally sold. However, a food additive regulation revocation by itself would not prohibit the legal sale or use of dichlorvos, under FIFRA, on packaged and bagged processed nonperishable food. To rectify this situation, EPA intends to cancel the related uses as soon as possible after any food additive regulation revocation becomes final.

II. Deleted Uses

Amvac Chemical Corp., the sole registrant of the technical grade of the active ingredient dichlorvos, has requested to amend its dichlorvos registrations by deleting all uses and directions for use in or on domestic dwellings (except for impregnated resin strips, total-release foggers, crack and crevice applications, and spot applications); rangeland grasses; greenhouses; tomatoes; tobacco; tobacco warehouses; food service establishments (except nonfood-handling areas); food-manufacturing establishments: bottling plants (including wineries, breweries, and soft drink plants), frozen food plants (including pizza plants and ice cream plants) (except nonfood-manufacturing areas); food-processing establishments: meat, poultry, and seafood slaughtering and/or packing plants (including those for edible fats and oils), frozen food plants (including those for fruits and vegetables), dairy product plants (including milk-
